

# VFI-540 Aluminum Metal Roof Coating

**A superior metal roof coating  
from the original  
manufacturer of polyurea  
hybrid roof coatings.**

Environmentally Safe  
Approved by Miami-Dade County,  
Florida 07-0713.04 / 09-20-12  
UL Approved

- VFI-540 is a spray-applied polyurea hybrid aluminum roof coating.
- The suspended aluminum flakes in VFI-540 repel the sun's heat, reducing air conditioning costs.
- It is self-flashing and completely seals joints, seams and roof penetrations.
- VFI-540 forms a superior encapsulant that protects your roof better than other roof coatings.

## ***Non-Prorated Warranty***

VFI-540 Aluminum Metal Roof Coating, when professionally applied and maintained, is covered by a non-prorated, leak-free warranty.

## ***An additional benefit!***

***The industry leader in polyurea elastomer roof coatings.***

# ***Why settle for less and have to recoat more often?***

- VFI-540 is less expensive to apply than other roof coatings. Only one coat achieves the same final coating thickness as two or three coats of other products.
- QUV Weatherometer exposure test equivalent to 15 years showed no visible deterioration or change in physical properties.
- VFI-540 has a high elastomer property that allows it to expand and contract as atmospheric conditions change ensuring a tight seal on the metal roof.
- Application in cooler temperatures and before approaching inclement weather is possible because of its rapid dry time.
- VFI-540 is resistant to inorganic bases, acids and hydrocarbon solvents.
- VFI-540's advanced technology provides the roof with a coating that is resistant to ultraviolet rays.
- VFI-540 has high physical properties such as tensile strength, elongation, hardness and tears resistance.
